### PROFILE

---

An aspiring full-stack developer seeking a challenging role where I can utilize my knowledge of front-end and back-end technologies to design and implement high-performance software applications

### SKILLS

---

#### Languages

Java, JavaScript, C, Python, HTML5 and CSS3

#### Frameworks/Libraries

React and jQuery

#### Tools

Git, GitHub, Eclipse, VS Code and Photoshop

#### Database

MySQL

### PROJECTS

---

#### Weather App | React, JavaScript, HTML, CSS and Weather API

- Developed a React weather app to address the need for real-time weather information.
- Integrated a weather API to fetch and display accurate data, utilizing React for a responsive user interface.
- Improved user experience by providing instant access to current weather conditions and forecasts.

#### Portfolio Website | React, JavaScript, HTML and CSS

- Designed and developed a visually appealing portfolio using React.js, HTML, and CSS.
- Implemented interactive features to showcase projects and skills, ensuring a captivating user experience.

### EDUCATION

---

#### Bachelor Of Engineering

Rajalakshmi Engineering College  
CGPA - 7.9

2020 – 2024

#### Higher secondary

Velammal Matriculation Higher Secondary School  
Score – 76.16%

2018 – 2020

### CERTIFICATES

---

- Data Structure and Algorithms using Java -NPTEL
- Web Development - Bolt IoT
- Database Management System - Infosys Springboard
- Ethical Hacking - NPTEL
